

Self-Exclusion Programs - Internet Controls & Web Blocking Software - Net Nanny

****Resource For the Gambler and Loved Ones**

• Self-Exclusion Programs - Internet Controls & Web Blocking Software

Self-Exclusion Internet Controls & Web Blocking Software such as **BetBlocker**, **Gamban**, **Gamblock**, and **Gambling Block** can also be a powerful tool for those that gamble on the Internet and would like to block the ability to access gambling sites, track and control Internet usage, or restrict access at specific times. Like self-exclusion, web-based exclusion programs allow users to “ban” themselves from being able to gamble online. There are free options as well as paid options, and this resource allows users to continue to utilize their computer for work and leisure but attempts to reduce the temptation to gamble as a result of pop up gambling site advertisements that would otherwise appear without the program. Many offer valuable tools such as the ability to track internet usage and even device location. A great feature of some web blocking software is that once installed, if the user tries to remove the program from their device, a prompt appears showing a map of available problem gambling resources in their area (such as the 888-ADMIT-IT HelpLine). There are also child protection websites such as, **Net Nanny**, **Cybersitter**, **Norton Family**, **Netsweeper**, **OpenDNS**, and **Qustodio** available, to help prevent underage access to online gambling. **Freedom** is an app and website blocker designed to improve focus and productivity by temporarily blocking distracting websites and apps (including gambling websites and apps) across multiple devices. Additionally, family features and apps offered by wireless service providers such as **Verizon Family Plus**, the **AT&T Secure Family® App**, and **T-Mobile's FamilyMode® App**, offer the ability for their customers to block gambling apps and websites in addition to other sensitive content.

Some of the FCCG's Online Gambling Self-Exclusion Internet Controls and Webblocking Software Program Resource Referrals include the following:

➤ Net Nanny

With Net Nanny®, parents can monitor their family's online activity and customize filters for each user. Our dynamic filtering technology blocks inappropriate content in real-time and provides the option to block, warn or allow users when viewing websites. Families can use Net Nanny® to protect users from pornography, online predators, cyber bullying, and other threats that compromise online safety.

Net Nanny's award-winning technology is able to filter the Internet, monitor your child's online activity, and block unsafe materials while still allowing kids access to safe websites. Unlike other parental controls that simply block a list of websites, Net Nanny's dynamic filter scans and analyzes each website to determine if it is appropriate for your child, based on the settings you customize for their profile.

Features

- Parental Controls
- Screen Time Management
- Website Blocker
- Parent Dashboard
- Block Apps
- Internet Filter
- Block Pornography
- Alerts and Reporting
- Family Feed
- Track Location

Why Net Nanny®

Net Nanny® is top-rated parental control software that parents have trusted since 1996. With the #1-rated Internet filter that can scan webpages and filter inappropriate content every time a page is loaded, you can be sure that your family is protected from mature and adult content.

Net Nanny® also features a powerful porn blocker and flexibility for parents to adjust their children's profiles to be uniquely customized. Parental controls are taken to another level with Net Nanny's screen time scheduler, which allows parents to manage and balance their child's Internet use.

Which Annual Net Nanny® Package is Right for My Family?

Net Nanny® offers a variety of product options, including a Single Device package for Windows desktops or laptops, as well as an option to bundle licenses for multiple devices and device types with Family Protection Passes for 5 devices or 20 devices.

Choose the Package That Fits Your Family

- Single Device package for Windows and macOS
- Family Protection Pass for 5 Devices (including Windows, macOS, and iOS)
- Family Protection Pass for 20 Devices (including Windows, macOS, and iOS)

Note: The Net Nanny® Family Protection Pass is available for consumer and home use only. Organizations wishing to purchase Net Nanny® should contact Sales at 1-484-856-2789 for commercial and volume pricing on ContentProtect.

How Much Does Net Nanny® Cost?

The annual retail price of Net Nanny® depends on which package you purchase. If your family needs solutions for multiple devices for your family, consider purchasing a [Family Protection Pass](#) for either 5 or 20 device licenses.

The Family Protection Pass can offer your family significant savings over individual Net Nanny® pricing. In fact, 20 individual licenses of Net Nanny for Windows or Mac purchased separately would normally cost over \$799.99, but with the Family Protection Pass for 20 devices, you can save \$700!

How Do I Download Net Nanny®?

You must have a Net Nanny® account before installing Net Nanny® on your child's device. Once you have a Net Nanny® account, go to install.netnanny.com from your child's device and follow the instructions. No matter what type of device you install the Net Nanny® Child software on, you can administer and manage all of your child's devices online from the Net Nanny® [Parent Dashboard](#) or from our iOS Parental Control app.

System Requirements

- [Net Nanny® for Windows](#): Windows 10 & 11*
- [Net Nanny® for Mac](#): macOS 10.13 to 11.x*
- [Net Nanny® for iOS](#): iOS 11 and higher

* 64-bit only

Parental Controls

Get peace of mind with the best parental control software available.

When your kids are spending time online make sure to keep them protected. Parental control software offers visibility into your children's online activity to help you understand their digital habits and keep them safe while they use the Internet. With Net Nanny®, you can monitor your family's digital habits and protect them from harmful content with the most trusted tool available to parents.

What is Parental Control Software?

Parental controls are software that helps parents filter, monitor, and control their family's online activity. Many families utilize parental control software as a tool to help keep their kids safe from dangerous or inappropriate online content that may not be safe for them to view. Parental controls can:

- [Filter adult content](#) in real-time
- [Block pornography](#)
- Send [alerts](#) of online activity
- Help you manage [screen time](#)
- [YouTube monitoring](#) and management
- Provide you with peace of mind

3 Reasons Why Your Family Needs Parental Controls

If you're not familiar with parental control software, learn the 3 reasons why this might be right for your family:

1. To Keep Your Kids Safe Online

Kids are exposed to many exciting, but also dangerous things on the Internet. With parental controls, you can limit their exposure to adult content and allow them access to safe websites and healthy online services.

2. To Manage Screen Time

Are you constantly fighting about screen time in your house? With Net Nanny®, you can set time limits for your child's device usage and only allow them access to the Internet when you choose.

3. To Have Visibility to Online Activity

It's impossible to monitor kids' online activity at all times, but with parental control software, you have visibility to their Internet use. With Net Nanny®, you can allow, alert or block websites from being viewed and receive notifications in the Net Nanny® [Family Feed](#) of your child's activity in real-time.

How Does Net Nanny® Parental Control Software Work?

Net Nanny® uses a dynamic **Internet filter** to contextually analyze the content of a webpage. This top-rated technology has allowed millions of families to limit the amount of inappropriate content their children are exposed to, while still allowing their family to access the beneficial websites available on the Internet.

By analyzing the content of a webpage in **real-time**, Net Nanny's #1-Rated Internet filter is able to provide Internet protection for your family the instant a website is loaded. This means that Net Nanny's **Internet filtering** is able to keep up with the fast-moving world of the Internet and can keep your kids safe while they are online, giving parents peace of mind.

How to Set Parental Controls for Your Family's Devices

Many electronic devices have built-in parental control software that can help you limit your child's online use. However, these native parental controls only work on each device it's installed on and rarely communicates with other devices. For families that have multiple phones, tablets and gaming consoles, this can mean spending a lot of time setting up parental controls on different interfaces, each with different instructions and a varying level of protection. Look for a parental control solution like Net Nanny® that can be a singular solution to keep your child safe on their Mac, PC, and iOS devices.

How to Set Native Parental Controls on Individual Devices

To learn how to set up the native parent controls on each of your family's devices, see our helpful step-by-step guides below:

Operating Systems

Whether you are an Apple or a Windows family, use these how-to guides to protect your family with parental controls on your device.

Protect your family with the best Internet filter and parental controls on the market since 1996.

Screen Time Management

Use Net Nanny® to limit screen time and manage your family's online activity.

Managing **screen time** can be an uphill battle, but with Net Nanny®, parents can take back control of the Internet and limit screen time for their kids. Using our **parental control software**, you can help your family balance screen time and downtime by scheduling the hours of the day they can access the Internet.

Why You Should Limit Screen Time for Kids

According to the American Heart Association, kids spend over 8 hours each day online - that's half of their time awake. Children are spending more and more time online with every aspect of their lives becoming connected and tied to a screen. From homework research to extracurricular activities and time spent online interacting with peers and friends, kids are racking up multiple hours each day of Internet and device use. Using Net Nanny® [parental controls](#), you can manage your child's daily screen time and create schedules or curfews for when your kids are on their devices and use the Internet.

Spending too much time in front of screens, and not enough time being active, can lead to:

- Childhood obesity
- Psychological problems
- Troubles in school
- Attention problems
- Eating and sleeping disorders
- Internet addiction

For parents, **screen time for kids** is a major concern, primarily because screen time scheduling and management tools are not readily available to help manage your family's online usage effectively - until now. Net Nanny's **parental controls** provide screen time limits for kids to help you manage their Internet use.

How Net Nanny® Screen Time Scheduling Works

With Net Nanny's award-winning [Internet filtering](#) technology, you can select specific times of the day when your child can use the Internet. And because of our unique scheduling system, you can also select specific days you want your kids to have access to their online devices, giving you the flexibility to adjust screen time allowances for weekdays or weekends.

Set Curfew

Ever wonder how much time your kids use their device? Net Nanny® lets parents see the daily total of each child's screen time and see how their devices are being used. Parents can manage daily screen time, create schedules or curfews for when kids use their devices, and easily adjust the allotted time allowances for each day.

Turn Off the Internet

No more arguing with your child when it's time for dinner or when they have had too much screen time. From your phone or any Internet-enabled device, turn off your child's access to the Internet on their device. Net Nanny® keeps the peace while applying the rules you want, when you want them.

The screen time scheduler allows parents to schedule and automatically apply downtime or institute curfews when you don't want your kids access to the Internet. Parents can easily adjust the allotted time and create specific allowances for each day. Parents can even choose to simply block the Internet during any selected time period. When the allotted time for screen time use is up, kids' devices are not able to connect to the Internet. With Net Nanny®, you can:

- Set specific times of the day when your child can use the Internet. (For example: Allow Internet access between 6 p.m. and 9 p.m.)
- Internet access turns off during scheduled hours or days that you select.
- Only a parent or admin can make changes to the screen time schedule.
- Schedule curfews for Internet use.
- Turn off the Internet.

Why Net Nanny® is Right for Your Family

For families who are looking for a way to increase their quality time spent together, Net Nanny's screen time management tool and scheduler are essential. It gives parents the power to restrict access during dinnertime or other crucial times so your family can enjoy a meal or activity together without digital distractions. You can also use the tool to be flexible during family vacations - allowing access when your family is relaxing by the pool or restricting access during bedtime.

The benefit of using Net Nanny's screen time scheduler is that parents can set their children's schedules with ease and not have to keep track with a timer or a clock for how much accumulated time their kids spend online. With Net Nanny®, you can set it and forget it.

How Net Nanny® Helps You Manage Screen Time

By using Net Nanny's screen time scheduler in coordination with our **award-winning Internet filter**, you can increase the productivity and safety of your children's digital activity by providing them with the best online experience possible.

When managing your family's online use, screen time scheduling makes it easier to not only limit how much time is spent each day or week, but also allows you flexibility in adapting those changes per user. For example, if your teenager is more active online during the weekends, you can expand their allowed access specifically for Saturdays and Sundays. And when you want to limit their screen time during the school week, you can restrict their schedule.

Net Nanny® is fully customizable for each individual user, too. As **screen time recommendations** change for different age groups, you can tailor your schedule based on what's right for each child. You can also use the screen time management tool for accountability on your own devices to increase productivity and **limit screen time** allowed on time-wasting websites.

Many adults struggle with online gambling or pornography addictions and by using a screen time scheduler, adults with addiction issues can more easily curb access to inappropriate websites and time online. By combining Net Nanny's screen time management tool with our top-rated [Internet filter](#) and [porn blocker](#), you can further distance yourself from websites and content that may trigger your addiction. **Help your family balance their screen time with the best parental control software that parents trust.**

Website Blocker

Net Nanny® is the most effective and best website blocker available for families. With Net Nanny's **website blocking software**, you can keep your family's online experience safe and tailor individual settings to **block websites** and block categories of web content based on each of your family member's needs. Net Nanny® allows for specific websites to be blocked or allowed, based on the settings you choose, so parents can freely surf the Internet, while knowing that children have age-appropriate safeguards in place.

Net Nanny's **website blocker** is proven to keep out unwanted content and **block pornography** with the **best Internet filter** available in the market today. You can feel confident that our [parental control software](#) is secure and that you have the ability to tailor the range of settings to fit the diverse needs of each member of your family to keep them safe while they use their devices online.

Why You Should Block Websites

With thousands of new websites created every day, it's overwhelming to keep track of which ones are safe for kids to access. Many families turn to blacklists, or lists of unsafe or mature websites, to keep their children's Internet experiences safe. Blacklist filtering is the oldest and still most common form of **website blocking** today. With a blacklist, when a user attempts to go to a website, the URL for that website is compared to a known list of inappropriate sites. If the website is on the list, that site is blocked. However, blacklists are not able to be updated as quickly as new unsafe websites are created or account for user-generated content that frequently changes. If your family is relying on outdated blacklists to keep your kids safe online, there is a high chance of exposure to **adult content**, pornography or dangerous websites. In this case, blacklists are prone to under-blocking, since their list of websites is likely out of date and can't keep up with user-generated content. However, blacklists can also over-block by prohibiting access to entire websites, when singular pages on the website may be perfectly safe.

Unlike most Internet filters that block entire websites, the award-winning Net Nanny® **web filtering** technology analyzes every webpage your child visits, plus content in certain apps. Our **content filter** then instantly determines if the content on that webpage is safe for your child to view, based on the category guidelines and website restrictions that you pre-determine.

Because Net Nanny® relies on real-time **Internet filtering**, your family is safer from inappropriate or unwanted websites. Parents using Net Nanny® still have the option of blocking websites individually and can tailor lists of allowed and blocked websites for each user on their account. Additionally, parents can choose from 14 different categories to allow, alert or block for their child.

How Net Nanny® Website Blocking Works

Net Nanny's state-of-the-art **web filtering** technology scans websites for inappropriate content in real-time. Unlike other software, Net Nanny® doesn't use cookie cutter website block lists - instead, our **Internet filtering** and **website blocking software** scans the content on each webpage and blocks it based on the categories that you choose to filter.

Net Nanny® parental control software scans websites as you're surfing, in real-time, blocking websites that contain material you've flagged in the settings. With our parent controls, you can rest assured that you have the power of the **best Internet filter** and website blocker protecting your family.

Net Nanny's Internet filter and website blocker utilizes artificial intelligence-based natural language filtering, which is not only able to detect specific keywords on a webpage but can also determine the context of that word relative to the content on the page. For instance, if the word "breast" is detected on a webpage, Net Nanny® will scan the rest of the page to determine if this word is used in the context of cooking (i.e. chicken breast) or an inappropriate context, and block accordingly. With over two decades of experience, the Net Nanny® filter is unsurpassed in its capabilities.

To see how Net Nanny's website blocker works, watch this video:

<https://www.youtube.com/watch?v=Zus67CFhems>

Additionally, with Net Nanny's website blocker, you can:

- [Filter the Internet](#)
- Block mature or inappropriate websites
- [Block pornography](#)
- Block websites based on 14 categories of the most questionable and concerning content types: Abortion, Adult Novelty, Anime, Death/Gore, Drugs, Gambling, Mature Content, Nudity, Pornography, Provocative, Strip Cuts, Suicide, Tobacco, Weapons
- Add approved websites to a list for each user
- Receive [alerts and reporting](#) of websites attempted to be accessed
- View history of alerted or blocked websites in the Net Nanny® [Family Feed](#)

Why Net Nanny's Website Blocker Helps Parent

Net Nanny's superior Internet filtering technology and **adult website blocker** is the perfect tool for analyzing today's Internet, which is dominated by constantly changing content. Net Nanny® is the best solution to protect your child - at home or at school, on apps or on websites - so you can have peace of mind. You can feel comfortable knowing that you have control over your child's digital experience and visibility to their online browsing, with the strongest web blocker to protect your family. Now, you can be worry-free when your child is accessing the Internet unsupervised because our parental controls are keeping them safe from inappropriate websites.

"The service has been very effective at blocking what we don't want to see and allowing what is okay." - Mike K.

By allowing your kids to access the Internet safely, you can encourage them to learn, have access to their online homework and research, fun and interesting topics with safeguards in place to protect them. With Net Nanny®, parents can trust that our top-rated Internet filter will **block websites** on Computers, Tablets, Laptops and, iPhones to keep your family's web browsing as safe as possible.

Protect your children instantly from adult content and pornography with the best website blocker available.

Block Apps

Block apps on your child's cell phone and tablet with Net Nanny's parental control software. With Net Nanny's **app blocking** feature, you have the power to control how your child is using mobile apps and the Internet, along with the visibility to know which apps are downloaded on their devices. If you're unsure what an app is, you can also view a short description and know immediately if it's safe for your child to use with the [App Advisor](#).

[Parental controls](#) help you by giving them access and insight into their kids' digital lives and giving them control and visibility over their kids' Internet activity. Net Nanny® parental controls go one step further, giving parents the ability to monitor how long their child is spending online, what they are searching for and the apps they use every day. All of this is backed by the **best parental control software** and porn blocking on the market with the top-rated Internet filter that families have trusted since 1996.

Learn how you can block apps on your child's [iOS](#) devices with Net Nanny's [Family Protection Pass](#).

View and Block Apps on Your Child's Devices

Net Nanny's app blocking allows parents to see which apps their child is using - which is something that may often be difficult for them to have visibility to without having physical access to their kids' device. The ability to view the apps your child has downloaded, along with the amount of screen time they're consuming, can give you the information you need to manage your children's digital habits.

Being aware of the apps on your child's phone is important for understanding how they use their devices. There are many apps that are in the app stores that are not appropriate for children or teens, even though they are popular among kids. By using Net Nanny® to **monitor phone activity**, you can see which apps your child is using and learn more about the apps in the Net Nanny® [App Advisor](#).

Do you need help monitoring your child's phone and viewing the apps they have downloaded on their devices? As parents, we need help to answer the questions we care about most:

- Are my kids spending too much time online?
- What are they seeing and doing online?
- Are they safe while they're online?
- What apps are they using?
- Are those apps safe for kids to use?

With Net Nanny®, parents can monitor their child's phone and have visibility to the apps they have downloaded. Parents can also block dangerous apps you don't want children to have access to.

Beyond visibility and control of the apps that your kids are using, Net Nanny® parental controls also [filter the Internet](#), [block websites](#), [block pornography](#), manage [screen time](#), offer [social media protection](#) and provide parents with instant [alerts and reporting](#).

How to Block Apps with Net Nanny®

If you're looking for a way to view and block apps on your child's iPhone or iOS device, consider using Net Nanny®. With Net Nanny's app blocking feature, you can:

- Block unwanted or inappropriate mobile apps*
- See app usage reports showing which apps your kids are using the most
- Receive instant alerts via push notifications
- View historical reports of apps' use and installs in the Net Nanny® Family Feed
- Learn about apps with the App Advisor
- View a short description about the app's purpose and intended use
- Have visibility to potential dangers and threats found in specific apps
- Read parent-friendly reviews
- View suggested age appropriateness

* App blocking on iOS devices includes an estimated 125 of the most common and concerning apps for parents

Why Net Nanny's App Blocking Helps Parents

With Net Nanny's app blocking feature, you can see which apps your kids have downloaded on their device and you have the power to **block access to apps** that you think are dangerous or inappropriate for them to use. Net Nanny® parental controls provide parents insight and awareness of the websites kids access and the apps they install and use regularly.

Learn more about if apps are safe or appropriate to use with parent-friendly reviews found in the Net Nanny® App Advisor. Net Nanny's **parental control software** gives parents the control they need to make sure their child's online activity is safe and protected around the clock.

View and block apps on your child's iPhone device with Net Nanny® parental control software.

Track Location

Instantly track your child's phone or tablet with Net Nanny's parental control software.

With Net Nanny® you'll never need to wonder where your child is again. Thanks to our smart location technology, you can see exactly where your child is at all times. There's no need to call or contact your child - with Net Nanny® location tracking, you can see their location on the Net Nanny® Family Overview Map. **GPS location tracking** allows you to track your child's location via their cell phone or tablet so you can feel comfortable knowing where your child is, whenever you need to know.

By using Net Nanny®, you can keep your family safe and gain visibility into their online activity by tracking their location, monitoring online searches, filtering the Internet and managing their screen time. [Parental controls](#) can help you keep your family safe by protecting children while they use their smartphones, tablets and computers. With location tracking, parents can keep track of each child's individual location, along with a history of past locations visited.

Learn how you can get visibility to your family's location and see other important device information on [Windows](#) and [iOS](#) devices with Net Nanny's [Family Protection Pass](#).

Instantly Know Where Your Child Is

Net Nanny® puts the power in your hands to protect your child and will help you know instantly where they are and whether they're safe. By **tracking your child's location**, you can have peace of mind knowing that

you are informed of their current location in real-time. Keeping kids safe is what we do best, whether it's with our top-rated [Internet filter](#), powerful [porn blocker](#), easy-to-use [screen time](#) scheduler or real-time location tracker.

Do you need software to track iPhone or iOS device locations for your kids? Look no further than Net Nanny's **location tracking** feature to help you track and locate your child's most visited locations. You'll even receive updates of your child's location within the revolutionary Net Nanny® Family Overview Map, for a quick listing of all your children's digital activity at a glance.

Tracking your child's iPhone is important because knowing where our kids are is crucial to their safety. As parents, we understand that kids always keep their devices close to them and instead of spending the time or energy to check in with a text or a quick phone call, you can now just look at the Net Nanny® Family Overview Map to view information about where your child is located and where they've been.

By focusing on real-time updates within the Net Nanny® Family Feed and the ability to view your child's location on the Net Nanny® Family Overview Map, you can save your check-ins for more important conversations and focus on quality phone calls and texts with your kids.

How Net Nanny® Location Tracking Works

If you're looking for a way to track your child's location on their iPhone, consider using Net Nanny®. Net Nanny® offers a complete solution for parents to monitor their child's online use and track their cell phone location to keep them safe.

With Net Nanny's location tracker, you no longer have to wonder or worry where your kids are or the locations they've visited in the past. It's easy for you to see a history of where your kids have been, and you can view locations on a Net Nanny® Family Overview Map. From the Net Nanny® Family Overview Map, you can see an overview of where all your children are in a single screen. Access the Net Nanny® Family Overview Map by logging into the Net Nanny® [Parent Dashboard](#) or by using the Net Nanny® Parent App on your iOS device.

With Net Nanny's location tracking feature, you can:

- View your child's location in real-time
- See past locations visited by your child
- Track all children's locations associated with your account
- View locations by address or on the Net Nanny® Family Overview Map

Why Net Nanny's Location Tracking Helps Parents

With Net Nanny's location tracking feature, you can see where your child has been by mapping their location history. You simply select a date and time and a detailed map appears to show you where your child has been.

Plus, if your child loses their device, you can trace its most recent location using Net Nanny®.

By using a **GPS tracker for kids' devices**, you can be assured that your family has the best protection and that you have full visibility to their digital activity. Use [Net Nanny®](#) to track your child's iPhone to make sure that location-related safety is the utmost priority for your family.

Keep an eye on your child's location and get peace of mind with Net Nanny's location tracker.

Internet Filter

Net Nanny® is the #1-Rated Family Internet Filter Trusted by Parents

Did you know that according to the Kaiser Family Foundation, roughly **70%** of children are accidentally exposed to pornography each year? With kids having more access to smartphones and technology at home and at school, **Internet filtering software** is only increasing in importance. With Net Nanny's real-

time **content filter**, parents now have visibility and control over their child's online activity with easy-to-use **parental controls**.

Parental Control Software That Goes Beyond Whitelists

Net Nanny® takes [parental control software](#) beyond what traditional whitelists and blacklists of websites are able to provide by allowing parents the ability to adapt to their child's online activity on a content category level. A whitelist is a list of websites with acceptable content, while a blacklist provides a list of websites that should be blocked due to adult or inappropriate content.

Many whitelists and blacklists available online quickly become obsolete, since there are countless new websites added to the Internet every day. But with Net Nanny's advanced Internet filter, websites are filtered each time a page is loaded in real-time, so you can protect your family's online activity instantly. Net Nanny® also allows parents to create a blacklist of sites you would not like kids to be able to visit.

Content Filtering Technology That Keeps Up with the Internet

Net Nanny® uses technology to review the content of each website your child browses, in real-time, without slowing down their computer or mobile device. In the time it takes you to enter a URL and hit "enter," our advanced filtering technology evaluates the website content **in the context in which it is used**.

Net Nanny® relies on state-of-the art technology to review the content of any website visited - each time you browse and in real-time. Why is that important? The Internet changes constantly as websites are updated daily, and thousands of new user-generated sites are added worldwide. Families and accountable individuals deserve an **adult content filter** that can keep up with these constant changes.

Our advanced filtering technology is even able to evaluate website content in the context in which it is used. For example, Net Nanny's Internet filter can distinguish between the use of the term "breast" when it's used in a medical or clinical context (i.e., breast cancer) or when used to discuss cooking (i.e., chicken breast) vs. when used in an adult or sexual context. Net Nanny® detects the contextual usage of words and will either allow or [block websites](#) based on the preferences customized for each individual user.

Net Nanny's content filtering software also uses cutting edge technology to review website advertisements and other frequently changing content – each time the webpage is refreshed. Net Nanny® reviews website content instantaneously and all webpages are categorized according to the content that is displayed at the time each page loads for viewing.

How Net Nanny's Internet Filter Works

With Net Nanny®, you can be sure you have the best protection available to shield your kids from online dangers. You'll have complete control over the settings that will guide the monitoring, and appropriate filtering, of your kids' devices.

Unlike most Internet filters that block entire websites, Net Nanny's award-winning technology analyzes every web page they visit, plus content in certain apps. Our **advanced Internet filter** then determines in real-time if it is safe for your child, based on the category guidelines that you pre-determine.

Whenever Net Nanny® determines there might be an unsafe situation for your child such as hate speech, pornography, or bullying, you will be alerted immediately. Net Nanny's Internet filtering technology checks each web page your child visits, as they search and surf, and either **allows**, **alerts**, or **blocks** based upon the settings you can customize for each user. With Net Nanny's [alerts and reporting](#), parents have the flexibility to determine which types of content is appropriate for each user in your family.

- **Allow:** This setting lets users access the websites you determine as safe.
- **Alert:** This setting will not block this website from users, but you will receive an alert that it was accessed and viewed.
- **Block:** This setting allows you to block this website from being viewed.

This makes Net Nanny® the perfect tool for analyzing today's Internet, which is dominated by constantly changing content. Net Nanny® is the **only product that can protect your child** - at home, or at school, for apps or on websites - you can know they are safe with the best Internet filter available.

Keep the Good, Block the Bad

Net Nanny® **checks each webpage** you visit in real-time and its [porn blocker software](#) eliminates the element of surprise on the Internet. Net Nanny's top-rated parental control software protects children from being exposed to unsuitable content with **real-time Internet filtering**. Our parental control software makes browsing the Internet safe and secure for your entire family.

Net Nanny's web filter allows in the good content you want to access, while keeping out harmful and inappropriate pages so your family can use the Internet without fear of accidental exposure to undesirable material.

With Net Nanny®, you can set each user's profile to view, alert, or block for the following types of websites that contain this type of content:

- Abortion
- Adult Novelty
- Anime
- Death/Gore
- Drugs
- Gambling
- Mature
- Nudity
- Pornography
- Provocative
- Strip Clubs
- Suicide
- Tobacco
- Weapons

These filtering categories are all available for all supported devices.

Tailored Internet Filter for Kids, Families or Individuals

We provide preset monitoring features, which can be changed to suit the unique needs of each member of the family. In addition to curbing accidental porn exposure, adults are able to utilize our web filtering for home use to establish accountability regarding gambling and pornography addictions. Since the Internet is full of mature and inappropriate content, a reliable and advanced **porn blocker** for kids and individuals is important to protect yourself and your family from unintended exposure.

Get peace of mind by knowing that your family is protected by the best Internet filter on the market.

Block Pornography

Keep out unwanted content with Net Nanny's #1-rated porn blocker software.

Parents, now you can take back control of your family's Internet and mobile browsing by keeping out **adult content**, while allowing access to websites that are useful and age-appropriate. Net Nanny® is the **best porn blocker software** used by families worldwide and entrusted to keep kids safe since 1996.

Why Your Family Needs Porn Protection

More than half of all children are accidentally exposed to pornography each year. Porn blocking software is important to prevent accidental exposure. **Porn blocking** is important for families because your kids can easily stumble upon or search for mature, offensive or dangerous content online.

Minimize Accidental Exposure to Pornography

With children accessing the Internet daily, the chance of them seeing **mature content** is on the rise. In fact, the average age of children viewing pornography is eleven years old. With Net Nanny, parents can **minimize accidental exposure** to adult content and pornography with our award-winning [internet filtering](#) technology and [screen time](#) management tool.

How Net Nanny® Blocks Pornography

Net Nanny® uses advanced technology to evaluate the content of a webpage each time you visit and in real-time. Why? Websites are constantly updating and changing, with hundreds of thousands of new user-generated pages added to the Internet every day. The ever-changing nature of the Internet demands a **porn filter** that can analyze new content and block porn around the clock, the moment you request a webpage.

With Net Nanny® **parental control software** installed on your family's devices, inappropriate searches are detected and parents will receive a warning of your child's online activity.

Our powerful **adult content blocker** can:

- Keep out pornographic or mature websites
- Filter pornography in real-time
- Allow access to approved websites or category content types
- Instantly allow or [block websites](#) based on your preferences
- Send alerts when inappropriate activity is detected

Why Net Nanny® is the Best Porn Filter

Net Nanny® uses advanced technology that evaluates the unique content of an individual webpage in the context in which words and phrases are used - all in real-time. Discover what makes Net Nanny® the best and most effective porn filter available:

Filters Based on Context

For example, Net Nanny® differentiates whether the word "breast" is being used on a website in a medical context (such as breast cancer) or in a cooking context (such as chicken breast) or in a sexual or adult context.

Analyzes Content in Real-Time

Net Nanny® also analyzes other content that changes frequently each time the screen is refreshed, like website advertisements or user comments, which may be inappropriate for your kids to view. With this **real-time porn filter**, webpages are categorized based on what the content is on the page at a given moment.

Blocks Websites Based on Settings You Determine

Our **advanced adult content filter** knows the difference between various terms and will block or allow websites based on the settings you determine and send [alerts](#) of your child's activity. If, by chance, Net Nanny® incorrectly categorizes a web page, a parent or Admin can override a particular website categorization at any time.

Customized Settings for Each User

Net Nanny® includes preset monitoring features, which can easily be customized to meet the unique needs of each family member or individual. With these tailored settings, you can decide what type of content is appropriate for everyone and create custom category content settings for each family member.

Doesn't Slow Down Your Device

In spite of this advanced technology, Net Nanny® does not slow down your computer or device in order to block pornography. The Net Nanny® porn blocker technology has been fine-tuned over 20 years, making it the fastest and most accurate filtering technology available.

Get Peace of Mind

Pornographers keep up-to-date on the latest technology and are developing new and subtle methods to take an innocent click of the mouse to the darkest places online. In addition, new websites are added to the Internet every hour and Internet users are creating unmonitored content on blogs, Wikis, and other websites all day and every day.

For this reason, **porn blocking software** that reviews all components of a web page is critical to making it safer for your family to use the Internet. For your own peace of mind and protection, allow Net Nanny's parental control software to help you win the battle against pornography.

Whether you're looking for an **adult content filter** for your family or as an accountability tool for individual use, Net Nanny® is a top-rated **porn blocker** and the most trusted tool designed to protect. With our advanced porn filter, you can have peace of mind knowing you are protecting your family with the **best Internet filtering tool** available.

Get peace of mind with Net Nanny's #1-rated porn blocking software!

Alerts and Reporting

Net Nanny® helps parents stay informed and aware of their family's online activity.

Net Nanny's **parental control software** allows you to receive notifications of your child's online activity to let you know if your child is attempting to view an inappropriate website. Parental controls help you monitor your family's online activity, [filter the Internet](#), and provides you visibility to your children's digital use. With Net Nanny®, you can be alerted to your child's online activity if a restricted website is attempted to be accessed. You can take comfort knowing that Net Nanny's award-winning **content filtering** technology is protecting your family from adult content and inappropriate websites and giving you **insight into your child's online activity**.

Be Alerted to Dangerous Online Searches

Parents know that visibility into their kid's online activities is essential in order to allow a timely response to issues. By viewing Net Nanny's usage alerts and reports of your family's online activity, you can take action if inappropriate websites are accessed and address them with your child.

By viewing notifications on Net Nanny's [Family Feed](#), you can stay up-to-date with your family's online searches and keep a close eye to see if inappropriate action occurs. With an overwhelming number of websites available online that may contain dangerous or harmful content, you can use Net Nanny® to stay aware of your family's digital habits.

Prevent Cyberbullying, Self-Harm and Risky Behavior

Net Nanny's [parental control software](#) provides visibility into the terms your child is searching online, giving you the ability to recognize patterns in your child's online activities.

Visibility to online searches is critical to help parents identify any red flag terms that may be related to cyberbullying, self-harm, risky behavior and even suicide. With the sensitive and often private nature of these issues, being aware of a potential issue can allow you the opportunity to address your child in a safe and open environment.

How Does the Net Nanny® Dashboard Work?

The Net Nanny® [Parent Dashboard](#) can be viewed from any web browser. The front page of the Net Nanny® Parent Dashboard includes the Net Nanny® Family Feed. This feed is the hub of your family's

online activity and helps you know that your family is protected with Net Nanny®. The Net Nanny® Family Feed gives you an overview of their latest online searches and notifications, including:

- **Alerts** about blocked or warned content including the website names, category of content and date and time the site was accessed
- Information about **daily screen time usage**
- **Search history details** including the search term and search engine used

How to Set Up Net Nanny® Email Alerts

To manage your account settings, you can use the Net Nanny® [Parent Dashboard](#) or install the Net Nanny® Parent App on your iOS device. You can access your family's online activity and make changes to account settings within the Net Nanny® Parent Dashboard. By accessing the Net Nanny® Parent Dashboard, you can have **insight into your family's digital use** and access your account from anywhere you have an Internet connection.

From within Net Nanny® Parent Dashboard or Net Nanny® Parent App, you can receive on-screen notifications of your child's online activity via the Net Nanny® Family Feed and other detailed reports. This lets you have visibility to your child's online searches to see how much [screen time](#) they're using, and be notified when a website is Blocked or Warned.

An overview of all the reporting actions available are below:

- View reports of Warned or Blocked websites
- View reports of online search terms
- In-app notifications to alert when Blocks/Warns occur
- Be alerted in real-time when a Block/Warn occurs

Since Net Nanny's Parent Dashboard can be accessed from any device with an Internet connection, you can have instant visibility to your child's online activity by viewing the alerts and notifications in real-time from the Net Nanny® Family Feed. You also have the ability to be instantly notified with in-app and push notifications when you install the Net Nanny® Parent App on your iOS device.

With Net Nanny®, you'll have visibility and insight into your child's Internet use in real-time with on-the-go access with the Net Nanny® Parent Dashboard and the Net Nanny® Parent App for iOS.

Get visibility to your child's online activity with the #1-rated parental control software.

Family Feed

Get insight and visibility into your family's online activity with Net Nanny's Family Feed.

With Net Nanny's **parental control software**, including the revolutionary Family Feed, you'll have the visibility to track, in real-time, the digital device use and online activity of each child in your family with an easy to view overview of all your family's digital activities.

[Parental controls](#) provides your family with the protection they need to surf the web safely while blocking websites, filtering the Internet and managing screen time. With the Family Feed, you can get an overview of your child's Internet use by logging into the Net Nanny® [Parent Dashboard](#) from any devices that have Internet access. Parents can also use their iOS device to install the Net Nanny® Parent App.

Get Visibility to Your Child's Online Activity

It's difficult as a parent to know exactly how your children are spending their time online, with an abundance of apps, websites and other services available with the Internet. The struggle to keep on top of your kids' [screen time](#) is increasingly challenging and parents need a solution that is easy to use, effective and trustworthy.

Net Nanny® is the leading [Internet filter](#) and [porn blocking software](#), used and trusted by millions of families since 1996. With Net Nanny's Family Feed, you can now have visibility into your child's smartphone use and can easily view how they're using their devices. Now, you can easily track how long they're spending on their devices and which topics they've searched for online.

On top of this, you'll have the **best website blocker** and **content filtering** to keep your kids safe while they're online. By using Net Nanny® parental controls, your child's devices will be protected with real-time content filtering that scans each website for inappropriate content each time a page loads.

Any time inappropriate content is detected, you'll receive a notification within your **Net Nanny® Family Feed**, along with the category of content detected.

How the Net Nanny® Family Feed Works

The Family Feed is an overview of your kids' online activity that can be viewed at a glance wherever you go. You can access the Net Nanny® Family Feed on your desktop or laptop with the Net Nanny® [Parent Dashboard](#) or on-the-go via the Net Nanny® Parent App on your iOS device. No matter how you access it, you'll receive important notifications that can help you take parenting to a whole new level. You'll be able to see how much screen time they've used each day and the ability to set screen time allowances for each day of the week. You'll also be able to increase or decrease the daily allocation of screen time your child can have and have the ability to turn off the Internet if you choose.

With the Net Nanny® Family Feed, you'll have access to:

Instant Alerts

The Net Nanny® Family Feed provides immediate [alerts](#) if your child views porn, drugs, weapons, suicide and other inappropriate content.

Instant Reporting of Online Searches

With the Net Nanny® Family Feed, you can track your child's Internet searches in real-time and receive alerts of online activity.

Access Anywhere from Your Devices

Get access to the Net Nanny® [Family Feed](#) from whichever device you choose - whether you're at home or work on a laptop or desktop computer or using your iOS smartphone.

YouTube Monitoring and Management

Our [YouTube Monitoring](#) feature will let you see video names, video length, view date, and you can even review the video with a direct link to each viewed video.

Educational Insights

Find insights from experts and other parents about installed and trending apps from our blogs and the [App Advisor](#).

Why Net Nanny's Family Feed Helps Parents

By having an overview of all your family's online activity at the tip of your fingers, you can make informed decisions about your child's **screen time use** and keep them safe and protected online. With cyber bullying, sexting and suicide growing among kids and teens, parents need a way to monitor their children's Internet use and filter out inappropriate content.

With Net Nanny®, if your child searches for pornography, suicide, drugs, or weapons, parents are immediately notified within the Family Feed. If you receive a notification of these searches, you can have a conversation with your child about what's going on in their life and why they might be interested in these topics. In some cases, early notification of dangerous online searches can help kids get the help they need if they're in tough situations.

The Family Feed offers you device protection for your entire family and multiple parents can have oversight of your child's devices. Simply put, Net Nanny® is the **best parental control software** on the market.

See your kids' screen time in action and get insight into your child's Internet activity with Net Nanny's Family Feed.

Parent Dashboard

Access the Net Nanny® Parent Dashboard from any web browser connected to the Internet - on-the-go or at home.

The Net Nanny® [Parent Dashboard](#) is designed for parents to be able to access the **parental control** settings of their child's profile and simply manage the many features Net Nanny® parental controls offers. The Net Nanny® Parent Dashboard can be accessed from any web browser on any device that is connected to the Internet or by installing the Net Nanny® Parent App on your iOS device.

Being able to manage your account settings and having visibility and insight to your child's online activity is crucial for parents trying to manage their family's screen time. Net Nanny's **parental controls** are easily accessible through the Net Nanny® Parent Dashboard, giving you access to your favorite Net Nanny® features like **website blocking** and the Net Nanny® Family Feed.

With the **Net Nanny® Parent Dashboard**, you can:

- Access the Parent Dashboard from any device with a web browser and Internet access
- View the Net Nanny® Family Feed to see what your family is doing online
- View and change **content filtering** settings
- Manage whitelisted and blacklisted websites
- See the blocked and alerted website reports
- Manage and view your kids' **screen time**
- Instantly turn off and resume Internet access
- Review your kids' online searches

See What Your Kids are Doing Online

Having visibility to your child's online activity can feel impossible, but with Net Nanny®, you have the power to see how your kids are spending their time on their devices and online. By accessing the Net Nanny® Parent Dashboard, you can manage your children's **screen time use** and see an overview of their device use and online activity.

Monitor Your Child's Screen Time

Help your family balance [screen time](#) by scheduling the hours of the day they can access the Internet and when you want your kids to have downtime. From Net Nanny's Parent Dashboard, you can view the Family Feed to see what your family is doing while they're online.

Review Your Child's Online Activity

The [Family Feed](#) is an overview of your kids' online activity that can be viewed at a glance wherever you go and can be accessed from the Net Nanny® Parent Dashboard or the Net Nanny® Parent App. No matter how you access it, you'll receive important notifications that can help you take parenting to a whole new level.

Access from Any Web Browser

By accessing the [Parent Dashboard](#) or installing the Net Nanny® Parent App on your iOS device, you can check online activity reports, change your child's profile settings or access your features on-the-go from any tablet or computer with an Internet connection.

Manage Website Blocking

Net Nanny's [website blocking software](#) keeps out unwanted content and [blocks pornography](#) using the best [Internet filter](#) in the market today. Net Nanny® allows for specific websites to be blocked or allowed,

based on the settings you choose for each child's profile, so they have age-appropriate safeguards in place.

Review Online Searches

With the Net Nanny® Parent Dashboard, you can review your child's online searches and be alerted if your child views porn, drugs, weapons, suicide and other inappropriate content. These reports are easily viewed via the [Family Feed](#). By seeing what your child is searching for online, you can be better prepared for handling common issues that may arise with your child's digital use, including cyberbullying or sexting.

Instantly Turn Off the Internet

With access to the Net Nanny® [Parent Dashboard](#), you can turn off the Internet access to your child's device instantly with just a few clicks of a button. Now, when you decide your child should not have Internet access on their tablet or phone, you can make sure they instantly disconnected. It's easy to turn the Internet back on, too, once you decide they can have access on their devices restored.

Stay up-to-date of your child's online activity and get peace of mind knowing you can access the Net Nanny® Parent Dashboard from anywhere.

Learn how you can protect your family's [Windows](#), [Mac](#) and [iOS](#) devices with Net Nanny's [Family Protection Pass](#).

What is Social Media Protection?

Social Media Protection is a new feature that lets Parent manage Social Media apps and services for their children. This tool lets parents manage kid's Social Media in 2 important ways:

1. **Social Media Protection** lets parent easily block unwanted or questionable services. Parents can choose to block all Social Media services or pick the ones they want to allow or block. All this is done from Social Media Protection screen.
2. Social Media Protection also allows for supported **Social Media services** to be protected and filtered with Net Nanny's content filtering technology. This means the same Content Filtering rules established for your child's Internet surfing can now be applied to Social Media consumption too.

Example: If Content Filtering settings are set to block Pornography, Violence, or other specific content filtering categories. These categories of content are detected and blocked within the Social Media services that are protected with Social Media Protection.

Social Media Protection Screen

Note: Social Media services that support protection are listed at the top. Other Social Media Apps and Services is listed below.

Note: Apps and services that do not support protection can still be blocked and managed by parents.

How does Social Media Protection work?

Parents can choose to block, allow, or protect Social Media services from the Social Media Protection screen. This screen is accessed by selecting the User from the top of Family Feed screen, then selecting the User's Avatar from the User Profile Screen and Selecting "Social Media Protection" from the Profile Setting page.

Setting an App or Service to "Block" will completely block Apps and Websites related to the respective service. Setting an App or Service to allow will completely allow all the App and Websites associated with this service without any content filtering applied.

For supported Social Media platforms, parents have a new powerful option called "Protect". When an App or Service is to "Protect" Net Nanny will apply the same content filtering restrictions that detect and block specific categories of web content to the respective Social Media service. To enable this protection, select the User avatar from the Profile Setting screen, then select Social Media Protection from the list. Social Media services that support this protection are listed toward the top of the page and have an option to set the app/service to "Protect".

Social Media Protection: How come some Apps and Services have an option to "Protect" and some do not?

Some Social Media services go to great lengths to use proprietary encryption and prohibit monitoring or protection. These services cannot be filtered and protected by Net Nanny content filtering technologies. To help parents that are concerned about the unprotected services, Net Nanny can instead fully block unsupported Social Media Apps and Services.

Some Social Media Apps give a message that there is a different "protected" way to open when my kid's attempt to open them. What does this mean?

Each Social Media service is different and provide different levels support for Net Nanny protection and monitoring. Some Apps simply open and provide protection and others require Net Nanny open the service or access to the service is a different way to ensure the content is monitored and safe.

Note: Net Nanny users can always see which Apps are protected and available by opening the Net Nanny Child App. The Child App now includes icons and shortcuts for Social Media Apps that are protected.
