

Self-Exclusion Programs - Internet Controls & Web Blocking Software - Norton Family

****Resource For the Gambler and Loved Ones**

• Self-Exclusion Programs - Internet Controls & Web Blocking Software

Self-Exclusion Internet Controls & Web Blocking Software such as **BetBlocker**, **Gamban**, **Gamblock**, and **Gambling Block** can also be a powerful tool for those that gamble on the Internet and would like to block the ability to access gambling sites, track and control Internet usage, or restrict access at specific times. Like self-exclusion, web-based exclusion programs allow users to “ban” themselves from being able to gamble online. There are free options as well as paid options, and this resource allows users to continue to utilize their computer for work and leisure but attempts to reduce the temptation to gamble as a result of pop up gambling site advertisements that would otherwise appear without the program. Many offer valuable tools such as the ability to track internet usage and even device location. A great feature of some web blocking software is that once installed, if the user tries to remove the program from their device, a prompt appears showing a map of available problem gambling resources in their area (such as the 888-ADMIT-IT HelpLine). There are also child protection websites such as, **Net Nanny**, **Cybersitter**, **Norton Family**, **Netsweeper**, **OpenDNS**, and **Qustodio** available, to help prevent underage access to online gambling. **Freedom** is an app and website blocker designed to improve focus and productivity by temporarily blocking distracting websites and apps (including gambling websites and apps) across multiple devices. Additionally, family features and apps offered by wireless service providers such as **Verizon Family Plus**, the **AT&T Secure Family® App**, and **T-Mobile's FamilyMode® App**, offer the ability for their customers to block gambling apps and websites in addition to other sensitive content.

Some of the FCCG's Self-Exclusion Internet Controls and Web blocking Software Program Referrals include the following:

➤ Norton Family

Norton Family is a robust parental control solution designed to help parents monitor and manage their children's online activities, ensuring a safe and productive digital environment. With the rise of online gambling and other inappropriate content, Norton Family offers a suite of features specifically tailored to block access to gambling websites and apps, among other potentially harmful content. Below is a detailed overview of its features, system compatibility, and pricing.

Key Features to Prevent Access to Gambling Websites and Apps

1. Website Blocking and Filtering:

- Norton Family allows parents to block access to specific categories of websites, including gambling, adult content, and other inappropriate material. The software maintains a constantly updated database of websites, ensuring that even newly created gambling sites are blocked.
- Parents can manually add specific gambling websites or apps to the blocked list, ensuring complete control over what their children can access.

2. App Supervision:

- Norton Family enables parents to monitor and block apps on their children's devices. Gambling apps can be explicitly blocked, preventing children from downloading or using them.
- Parents receive alerts if their child attempts to download or access a blocked app.

3. Time Supervision:

- Parents can set time limits for device usage, reducing the likelihood of children accessing gambling sites or apps during unsupervised hours.
 - Specific schedules can be created to allow device usage only during designated times, such as after homework or on weekends.
4. **Search Monitoring:**
- Norton Family tracks search terms used by children on popular search engines. If a child searches for gambling-related terms, parents are notified, and the search can be blocked.
 - The feature also filters out gambling-related content from search results.
5. **Instant Lock:**
- Parents can instantly lock a child's device remotely, preventing access to the internet or apps during critical times, such as when gambling activity is suspected.
6. **Alerts and Notifications:**
- Parents receive real-time alerts if their child attempts to access a blocked gambling website or app, allowing for immediate intervention.
 - Weekly or monthly activity reports provide a summary of online behavior, including attempts to access restricted content.
7. **Location Tracking (Optional):**
- While not directly related to gambling, this feature helps parents ensure their children are not visiting physical locations where gambling might occur, such as casinos or betting shops.
-

System Compatibility

Norton Family is designed to work across a wide range of devices and operating systems, ensuring comprehensive coverage for families with multiple devices:

Windows™ operating systems

- Windows 7 all versions with Service Pack 1 (SP 1 with SHA-2 support) or later.
- Windows 8, 8.1, 10, and 11 (all versions) except Windows in S Mode.
